MC 100MA-2

10/100 Mbit/s Media Converter

1. GENERAL DESCRIPTION

The media converter transforms the transmission media of Ethernet signal from CAT5 100m to optical fiber 850/1310/1550nm. It can extend the transmission distance to several kilometers or hundred kilometers.

All Cudy Media converters apply the new 0.25 μ m technology to improve the performance and to avoid the packet lost with long the transmission. It also reduce the delay time to less than 9.6 μ s.

Using media converter is an economical solution to achieve long distance transmission base on current status.
